

# Mr Robert Macdermott

MB ChB, MD, FRCOG

## Scans, tests & treatments available

- Hysterectomy
- Vaginal prolapse repair
- Hysteroscopy
- Laparoscopy

## NHS Practices

Darent Valley Hospital

## Professional Profile

Having trained in Yorkshire, I moved to Kent in 2000 to take up a Consultant post at Darent Valley Hospital, Dartford. I treat a wide range of gynaecological conditions and have special interests in Urogynaecology (the treatment of urinary incontinence and prolapse), the treatment of heavy periods and Minimal Access Surgery (keyhole surgery).

I promote shared decision-making and was a pioneer in routinely copying clinical letters to patients. My website [www.kentgynaecologist.com](http://www.kentgynaecologist.com) provides a wealth of useful information to help women make the right decisions about their treatment.

## Special Interests

Urogynaecology
